PLENTY OF WORK.
Moberly, Mo., Dec. 2.—Thirty-five laborers said to have been sent out by employment agencies in St. Louis, Kansas City and Omaha are stranded in Moberly and are unable to get work. Each man asserts he gave an employment agency \$1 to get a position with a truck gang on the Wabash. Three of the applicants appealed to Police Judge Frank Tedford. They asserted ten minutes after they began work the foreman discharged them and refused to let them have their suit cases because they had eaten dinner at the camp.

IN MEMORIAM.
Once more a link of our golden chain has fallen away in death. And Pasadena Chapter No. 108 mourns the loss of Brother Wm. F. Schmalz.
His home was in Miles City, Montana, but he spent a great many winters here and affiliated with our Chapter May 19, 1905. He was also a member of the American Legion here. He leaves a brother in Miles City, Mont. and a sister at Illmo, Mo.

Bro. Schmalz was a scout under the great warrior, Gen. Miles, during the bloody days of Indian ravages on the western frontier. He was the hand on more than one occasion which wielded the sword that opened the pathway to civilization and Christian enlightenment in this nation.

Bold and daring as a soldier he was ever obedient and eager to risk his life in the service of his country. As a citizen he was respected and prosperous; loyal to friends and charitable, and through his entire public life was ever allied with those interests for the advancement of civic betterment. Let the mantle of peace enshroud his ashes and the altar of humanity, peace abide his soul. Life with its strife and battles, is over and death claims its own—leaving us memory only of him who is gone, but to loved ones never forgotten. Dora K. Chapman, Sarah Sebastian Powers, Dora G. Chapman, Com.

NATIONAL SOCIALIST PLATFORM

It Looks Just as Good, and Means the Same, the Day After Election as the Day Before.—Read it.

The Socialist party of the United States declares that the capitalist system has put down its historical function and has become utterly incapable of meeting the problems confronting society. We denounce this outgrown system as incompetent and corrupt, and the source of unpeppable misery and suffering to the whole working class.

Under this system the industrial equipment of the nation has passed into the absolute control of a plutocracy which exacts an annual tribute of millions of dollars from the producers. Unafraid of any organized resistance, it stretches out its greedy hands over the still undeveloped resources of the nation—the land, the mines, the forests and the water powers of every state in the union.

In spite of the multiplication of labor-saving machines and improved methods of industry which cheapen the cost of production, the share of the producers grows ever less, and the price of all the necessities of life steadily increase. The boasted prosperity of this nation is for the owning class alone. To the rest it means only greater hardship and misery. The high cost of living is felt in every home. Millions of wage-workers have seen their wages decrease until life has become a desperate battle for mere existence.

Multitudes of unemployed walk the streets of our cities or trudge from state to state awaiting the call of the employers to move the wheels of industry.

The farmers in every state are plundered by the increasing prices exacted for tools and machinery, and by extortionate rent, freight rates and storage charges. Capitalist concentration is mercilessly crushing the class of small business men and driving its members into the ranks of the propertyless wage-workers. The overwhelming majority of the people of America are being forced under a yoke of bondage by this soulless industrial despotism.

It is this capitalist system that is responsible for the increasing burden of armaments, the poverty slums, child labor, most of the insanity, crime and prostitution, and much of the disease that afflicts mankind.

Under this system the working class is exposed to poisonous conditions, to frightful and needless peril in life and limb; is walled around with court decisions, injunctions and unjust laws, and is preyed upon incessantly for the benefit of the controlling oligarchy of wealth. Under it also the children of the working class are doomed to ignorance, drugging and darkened lives.

In the face of these evils, so manifest that all thoughtful observers are appalled at them, the legislative representatives of the Republic, Democratic and all reform parties remain the faithful servants of the oppressors. Measures designed to secure to the wage earners of this nation as humane and just treatment as is already enjoyed by the wage earners of all other civilized nations have been smothered in committee without debate, and laws ostensibly enacted to bring relief to the farmers and general consumers are juggled and transformed into instruments for the exaction of further tribute. The growing unrest under oppression has driven these two old parties to the enactment of a variety of regulatory measures, none of which has limited in any appreciable degree the power of plutocracy, and some of which have been perverted into means for increasing their power. Anti-trust laws, railroad restrictions and regulations, with the prosecutions, indictments and investigations based upon such legislation, have proved to be utterly futile and ridiculous.

Nor has this plutocracy been seriously restrained or even threatened by any Republican or Democratic executive. It has continued to grow in power, and insolence as like under the administrations of Cleveland, McKinley, Roosevelt and Taft.

In addition to this legislative juggling and this executive connivance, the courts of America have sanctioned and strengthened the hold of this plutocracy as the Dred Scott and other decisions strengthened the slave power before the civil war.

We declare, therefore, that the longer sufferance of these conditions is impossible, and we purpose to end them all. We declare these to be the product of the present system in which industry is carried on for private greed, instead of for the welfare of society. We declare, furthermore, that for these evils there will be no and can be no remedy and no substantial relief except through Socialism, under which industry will be carried on for the common good, and every worker receive the full social value of the wealth he creates.

Society is divided into warring groups and classes, based upon material interests. Fundamentally, this struggle is a conflict between the two main classes, one of which, the capitalist class, owns the means of production, and the other, the working class, must use these means of production on the

terms dictated by the owners. The capitalist class, tho' few in number, absolutely controls the government—legislative, executive and judicial. This class owns the machinery of gathering and disseminating news through its organ, the press. It subsidizes seats of learning—the schools and colleges—and even religious and moral agencies. It has also the added prestige which established custom gives to any order of society—right or wrong.

The working class, which includes all those who are forced to work for a living, whether by hand or brain, in shop, mine or on the soil, vastly outnumber the capitalist class. Lacking effective organization and class solidarity, this class is unable to enforce its will. Given such class solidarity and effective organization, the workers will have the power to make all laws and control all industry in their own interest.

All political parties are the expression of economic and class interests. All other parties than the Socialist party represent one or another group of the ruling capitalist class. Their political conflicts reflect merely superficial rivalries between competing capitalist groups. However they result, these conflicts have no issue of real value to the workers.

Whether the Democrats or Republicans win politically, it is the capitalist class that is victorious economically. The Socialist party is the political expression of the economic interests of the workers. Its defeats have been their defeats and its victories their victories. It is a party founded on the science and laws of social development. It proposes that, since all social necessities today are socially produced, the means of their production and distribution shall be socially owned and democratically managed.

In the face of the economic and political aggressions of the capitalist class, the only reliance left the workers is that of their economic organizations and their political power. By the intelligent and class-conscious use of these they may resist successfully the capitalist class, breaking the fetters of wage slavery, and fit them selves for the future society, which is to displace the capitalist system. The Socialist party advocates the full significance of class organization and urges the wage earners, the useful farmers and all other useful workers everywhere to organize for economic and political action, and we pledge ourselves to support the toilers of the fields as well as those in the shops, factories and mines of the nation in their struggle for economic justice.

In the defeat or victory of the working class party in this new struggle for freedom lies the defeat or triumph of the common people of all economic groups, as well as the failure or the triumph of popular government. Thus the Socialist party is the party of the present day revolution, which marks the transition from economic individualism to Socialism, from capitalist oligarchy to industrial democracy.

As measures calculated to strengthen the working class in its fight for the realization of its ultimate aim, the co-operative commonwealth, and to increase its power of resistance against capitalist oppression, we advocate and pledge ourselves and our elected officers to the following program:

1. The collective ownership and democratic management of railroads, wires, telephones, express service, steamboat lines and all other social means of transportation and communication and of all large-scale industries.
2. The immediate acquirement by the municipalities, the states or the federal government of all grain elevators, stock yards, storage warehouses and other distributing agencies, in order to reduce the present extortionate cost of living.
3. The extension of the public domain to include mines, quarries, oil wells, forests and water power.
4. The further conservation and development of natural resources for the use and benefit of the people:

- (a) By scientific forestation and timber protection.
- (b) By the reclamation of arid and swamp tracts.
- (c) By the storage of flood waters and the utilization of water power.
- (d) By the stoppage of the present extravagant waste of the soil and of the products of mines and oil wells.
- (e) By the development of highway and waterway systems.

5. The collective ownership of land wherever practicable, and in cases where such ownership is impracticable the appropriation by taxation of the annual rental value of all lands held for speculation.
6. The collective ownership and democratic management of the banking and currency system.
7. The immediate government relief of the unemployed by the extension of all useful public works. All persons employed on such works to be engaged directly by the government under a work-

day of not more than the eight hours, and at not less than the prevailing union wages. The government must also establish employment bureaus; to lead money to states and municipalities without interest for the purpose of carrying on public works, and to take such other measures within its power as will lessen the widespread misery of the workers caused by the misrule of the capitalist class.

8. The conservation of human resources, particularly of the lives and well-being of the workers and their families.
9. By shortening the workday in keeping with the increase productivity of machinery.
10. By securing to every worker a rest period of not less than a day and a half in each week.
11. By securing a more effective inspection of workshops, factories and mines.
12. By forbidding the employment of children under 16 years of age.
13. By the co-operative organizations of industries in federal penitentiaries and workshops for the benefit of convicts and their dependents.
14. By forbidding the interstate transportation of the products of child labor, of convict labor or the awarding of contracts to co-operative groups of workers.
15. By abolishing the profit system in government works and substituting either the direct use of labor or the awarding of contracts to co-operative groups of workers.
16. By establishing maximum wage scale.
17. By abolishing official charity and substituting a non-contributory system of old-age pensions, a general system of insurance by the state of all its members against unemployment and invalidism and a system of compulsory insurance by employers of their workers, without cost to the latter, against industrial diseases, accidents and death.

POLITICAL DEMANDS.

1. The absolute freedom of press speech and assembly.
2. The adoption of a graduated income tax, the increase of the rates of the present corporation tax and the extension of inheritance taxes, graduated in proportion to the nearness of kin—the proceeds of these taxes to be employed in the socialization of industry.
3. The abolition of the monopoly ownership of patents and the substitution of collective ownership, with direct reward to inventors by premiums or royalties.
4. Unrestricted and equal suffrage for men and women.
5. The adoption of the initiative, referendum and recall and of proportional representation, nationally as well as locally.
6. The abolition of the senate and veto power of the president.
7. The election of the president and the vice-president by the direct vote of the people.
8. The abolition of the power usurped by the Supreme Court of the United States to pass upon the constitutionality of the legislation enacted by congress. National laws to be repealed only by act of congress or by a referendum vote of the whole people.
9. The abolition of the present restrictions upon the amendment of the constitution, so that that instrument may be made amendable by a majority of the voters in a majority of the states.
10. The granting of the right of suffrage in the District of Columbia, with representation in congress, and a democratic form of municipal government for purely local affairs.
11. The extension of democratic government to all United States territory.
12. The enactment of further measures for general education, and particularly for vocational education in useful pursuits. The bureau of education to be made a department.
13. The enactment of further measures for the conservation of health. The creation of an independent bureau of health with such restrictions as will secure full liberty for all schools of practice.
14. The separation of the present bureau of labor from the department of commerce and labor, and its elevation to the rank of a department.
15. Abolition of the federal district courts and the United States circuit courts of appeals. State courts to have jurisdiction in all cases arising between citizens and foreign corporations. The election of all judges for short terms.
16. The immediate curbing of the power of the courts to issue injunctions.
17. The free administration of justice.
18. The calling of a convention for the revision of the constitution of the United States.

Such measures of relief as we may be able to force from capitalism are but a preparation for the workers to seize the whole powers of government in order that they may thereby lay hold of the whole system of socialized industry and thus come to their rightful inheritance.
